

KICKOFF & GROUNDING

Agents of Administration Hackathon

AI for the work no one can afford to get wrong.

Presented by Alix

Alix HQ, San Francisco · Mon 7/27 – Tue 7/28

WELCOME

Agenda

What we'll cover in the next few minutes, then you build.

01 What Alix does

02 The challenge & theme

03 The three tracks

04 Tools, datasets & the problems you're solving

05 Prizes

06 How you'll be judged

07 Logistics, rules & support

08 Go build

What Alix Does

THE CHALLENGE

Life's hardest admin

Build AI for the high-stakes,
paperwork-heavy, emotionally loaded
processes that ordinary adults dread.

WHAT WE CARE ABOUT MOST

Take hours out of the system

The best builds meaningfully reduce the pain, time, or error in a genuinely hard administrative process.
Measurable, real-world impact — not a demo of a demo.

30%

Real-World Impact is the single largest judging weight

Over two days, each team picks one track, builds a working solution, and presents it live to our judging panel.

Pick one of three tracks

Teams build in one of three tracks.
Pick the one that fits your team's strengths.

01

Rules as Data

Make messy regulation trustworthy and queryable.

Track Mentor: Soren

02

Talk to Me

Voice agents for the hardest conversations.

Track Mentor: Mitch

03

Paperwork, Killed

Messy scans in, valid filled forms out.

Track Mentor: Ian

Rules as Data

THE PROBLEM

Government and institutional rulebooks — tax code, benefits eligibility, insurance policy terms, court deadlines — are messy prose full of exceptions. Ask an LLM about them directly and it hallucinates.

WHAT TO BUILD

Turn those rules into structured, deterministic data — decision tables, a knowledge graph — so the model only reasons over verified facts.

EXAMPLE BUILDS

"Do I qualify for this benefit, and how much?" · "What do I actually owe in taxes and which credits apply?" · "Is this claim covered under my policy?"

ENCOURAGED TECH

Structured extraction

Decision tables

Knowledge graphs

LangChain / LlamaIndex

Vector store, if useful

ENCOURAGED DATASETS

eCFR · IRS publications & instructions · state benefits eligibility rules (SNAP / Medicaid) · court filing rules · benefits.gov / USA.gov

Talk to Me

THE PROBLEM

The hardest administrative moments happen in conversation — and they're cold, confusing, and painful. A voice agent can handle them with empathy and accurate data capture.

TWO DIRECTIONS YOU CAN TAKE

Inbound — the agent conducts the hard conversation: benefits or patient intake, financial-hardship intake, reporting an incident. Replaces the 45-minute form or the dreaded phone tree.

Outbound — the agent makes the call you've been dreading: disputing a medical bill, fighting an insurance denial, chasing a claim's status.

ENCOURAGED TECH

Vapi

Retell

LiveKit

Deepgram — speech-to-text

ElevenLabs — text-to-speech

Twilio — telephony

ENCOURAGED INPUTS

Sample intake scripts and hardship scenarios · real forms to complete through conversation (these pair well with Track 3 sources)

Paperwork, Killed

THE PROBLEM

The administrative paperwork a normal adult actually has to deal with — messy scans and PDFs that must become correctly filled, valid forms.

WHAT TO BUILD

Messy scans → structured data → a correctly filled, real government or financial-institution form (IRS, DMV, county, insurance, bank onboarding).

🌿 Build on **Anvil** (form-fill / PDF API) — the Anvil founder is giving all builders free access to the product for the event, and there's a \$1,000 award for the best use of it.

ENCOURAGED TECH

Anvil — form-fill / PDF API

AWS Textract

Google Document AI

Tesseract

Structured extraction

ENCOURAGED DATASETS

IRS forms (W-9, 1040) · DMV & county forms · sample scanned documents · common financial-institution onboarding forms

PRIZES

\$5,000 total

One prize pool, awarded as four distinct awards — plus a recruiting fast-track.

Best Overall

\$2,500

Best Use of Anvil

Sponsored by Anvil

\$1,000

Audience Favorite

Crowd vote

\$1,000

Best Demo

\$500

How you'll be judged

Five weighted criteria

Real-World Impact

Does it meaningfully improve a difficult administrative process?

Technical Execution

Does the product work, and has AI been used thoughtfully?

Product Quality

Is it useful, clear, and appropriate for its intended users?

Originality

A fresh or compelling approach to the problem?

Demo

Does the presentation clearly show problem, solution, outcome?

Run of show

DAY 1 — MONDAY, JULY 27

10:00 AM	Doors open — registration, coffee, networking, find teams
10:30–10:45 AM	Introduction to Alix
10:45–11:30 AM	Tracks explained & assigned
11:30 AM	Building begins
1:00 PM	Lunch
5:00 PM	Wrap up

DAY 2 — TUESDAY, JULY 28

9:00 AM	Doors open — coffee & networking
9:30 AM	Building continues
12:30 PM	Lunch
3:30 PM	Presentations & Awards

Demo format

Presentations & Awards begin at **3:30 PM on Day 2** .
Each team presents live to the judging panel.

Show the problem, the working solution, and the outcome or impact.

JUDGING PANEL SCORES ON

Impact · Technical execution · Product quality · Originality
· Demo

Time per team - 3 min demo + Q&A

Teams

2–3

builders per team

Register solo or with others — participants are **matched into teams onsite** at kickoff.

Open to builders of any experience level; in person in SF.

Access, tools & support

Mentors onsite

Team formation and mentorship are provided onsite — mentors are available throughout to help you scope your project and unblock you.

Bring your own API keys

Shared API credits aren't provided, so come ready with keys for any paid LLM or voice tools you plan to use.

Anvil is covered

The Anvil founder is providing free product access to all builders for the event.

Meals & swag

Food, snacks, and refreshments throughout; dietary restrictions accommodated. Alix Hackathon T-shirts for all.

Rules

PHOTOGRAPHY NOTICE

Photography and filming take place during the event; images and recordings may be used by Alix for recaps, recruiting, social media, and promotional materials.

Be excellent to each other. Build something real.

Go build.

Pick your track. Use the tools. Solve a real problem. Take hours out of the system.

Demos Tuesday at 3:30 PM. Good luck.
